

## PayDock Announces Partnership with Bleckwen

### Minimising Credit Card Fraud in Real-time with Artificial Intelligence and Machine Learning

**London, UK:** PayDock has announced a partnership with Bleckwen, an award winning Behavioural Analytics Software Company. With their proprietary artificial intelligence and real-time machine learning analysis service, Bleckwen will enhance fraud detection and prevention capabilities to all merchants on the PayDock framework. This will be done without disruption to existing gateway or service provider relationships inline with PayDock's plug-and-play philosophy.

“

There are two goals in payments, to keep the bad guys out and let the good guys in. Reducing fraud is the first step, however this must be done in a way that doesn't block legitimate purchasers. False positives can be as detrimental to a bottom line as genuine fraud. Bleckwen solves this with a lightning-fast, ground breaking fraud analysis. PayDock brings it to the market seamlessly”

Rob Lincolne Founder and CEO at PayDock

“

We're excited to partner with PayDock as this allows us to combine our expertise and technology to out-smart the bad guys and better protect consumers. Our purpose is to Create a Safer Societe and our relationship with PayDock delivers a cost effective, fast, frictionless and more secure service for merchants.”

David McLaren, VP Sales EMEA at Bleckwen

#### The benefits of the new partnership include:

- Instant fraud protection for over 24 different payment services on PayDock
- No need for merchants to switch gateways, simply plug-and-go
- Real-time fraud reporting and management on the PayDock Merchant Dashboard
- Lower assessment costs than alternative solutions in market
- Low cost of adoption due to non-disruptive connection through PayDock
- Enhances all gateways and payment service providers overnight

Bleckwen is an award-winning Behavioural Analytics software company, dedicated to help Banks and Financial Institutions to defeat fraud and make a safer world. We take state-of-the-art technologies, applied research, quality engineering and passion to deliver great solutions for our clients.
